Subject: Successful Use and Tests of Adsorb-it Products at DFSP-Puget Sound

Mr. Pearse:

The Manchester Fuel Department has successfully used the Adsorb-It product in the roll form in polishing filters downstream of our oil water separators, as beach barrier on several shorelines here. In addition we have tested the product in Sheen Sweeps, the bilge pillows, the Dumbo surfers and have tested the product configured to our Marco Skimmer.

MFD would like to thank you for your support of our spill response program. This product has successfully recovered small amounts of light product sheen from water surfaces (Diesel and Kerosene products) and has helped prevent product from entering the waterways. We are in fact, going to use it in a new, engineered application at one of our oil water separators complexes.

Although, we cannot endorse any specific product, I do want to thank you for your support of our programs and helping us find successful solutions to recovering light product in our applications and for helping us to solve some very vexing environmental problems. Please call me if you have any questions at (360)476-2135 ext 223 or email at glenn.Schmitt@navy.mil.
